

Marta Skowrońska

2nd Department of Neurology. Institute of Psychiatry and Neurology, Warsaw, Poland

- I'm a neurologist specializing in rare movement disorders with brain metal accumulation: Wilson's Disease and NBIA.
- I also specialize in neurosonology - TCS – ultrasound technique for neurodegeneration and dystonia treatment with botulinum toxin administration under ultrasound control.
- My research interest is mainly focused on MPAN and PKAN.
- I'm looking into the clinical course of the disease, but also for the laboratory biomarkers of disease progression.
- I'm also involved in research on metabolic abnormalities in NBIA.
